INDUSTRY TECH OUTLOOK
10 BEST SHAREPOINT
SOLUTION PROVIDERS OF 2022

SOFTVATIVE

A PROVIDER OF INNOVATIVE
SOLUTIONS, SERVICES & TRAININGS

Softvative has been Microsoft certified partner since 2008. The company is currently certified in "Content and Collaboration" and "Project Portfolio management" categories. Softvative has depth and breadth of skills across multiple domains to serve their customers with a holistic approach and outstanding solutions. Most customers face issues stemming from the architecture, design, integration, support, and project management aspects around SharePoint and document management solution's rollout. Softvative handles solid integration, sound architecture, detailed project planning, robust ITSM practices, and training. What they say, "It's the man behind the machine and the morale that matters." Softvative satisfies customers' complex projects with that approach.

COVER
STORY

Faisal Masood
Founder, Softvative

Softvative was founded in 2008 in Eden Prairie, Minnesota, USA. The company evolved in 2012 when it added cloud solutions into the practice and helped customers with cloud and on-premises migrations and solutions. The company had a 3rd major milestone around 2020 when it launched new website 3.0 and services models. Sharepoint is becoming one of the fastest-growing applications used by companies of all sizes. A customer's geographically separated workforce can easily collaborate in secure way. Softvative offers services and solutions on collaboration, content management, Knowledge Management, Document Management, business workflow, Business Data Reporting, dashboard, Sharepoint BI, Enterprise Search, Enterprise Social media, and training using Sharepoint as the platform.

The company provides engaging solutions and services using best in industry processes, frameworks, and technologies. Softvative has staff that is certified in numerous areas and technologies. Softvative's services and product model include combining the best technologies with the industry's well-known business processes. They incorporate TOGAF architecture standard, ITSM/ITIL for excellence in operational best practices with ServiceNow and IT Chervell, PMI/Agile processes with Microsoft Project PPM and Jira for project portfolio management, Microsoft SharePoint, Microsoft 365, and digital transformations solutions with AIIM's and other best practices, adding automation and LEAN processes for best in class solution delivery.

It is pertinent to mention that its Information Technology and web strategy solutions help customers lower costs and get more revenue. Softvative provides IT and Web strategy services solutions to customers using industry-leading products. Out IT strategy includes thorough planning. Softvative web strategy consists of a holistic approach to customer's online presence. Softvative's solutions are competitive in price and best in quality that the customers can focus

Faisal Masood
Founder, Softvative

on their primary business while offloading their IT and Web needs in the safe hands with Softvative partnership.

Softvative has been providing solutions and services around digital transformation using Microsoft 365 solutions, including SharePoint, Project, Power Automate, Power Apps, PowerBI dashboards, and other collaboration solutions. Softvative has helped customers integrate ERP systems like SAP with SharePoint in on-premises and online scenarios with the integration of OpenText, Kofax OCR, and other solutions.

Softvative helped fortune 100 customers with SAP ERP-SharePoint document management integration. We have a sound Enterprise architecture, information architecture/design using TOGAF standards to visualize the upcoming problems

beforehand. The automation using PowerShell, Chef, and Octopus deploy, SolarWinds, AppDynamics monitoring allowed us to automate most of the typical manual procedures. Softvative uses the Gimmal ERP middleware with business rules to integrate the SAP business objects with SharePoint Document Management solution for SAP document archiving. They combined the OpenText Capture Center or Kofax as the OCR solution with SharePoint to automate business transactions' paper to digital conversion. Softvative adopted Microsoft Office Online Server with SharePoint to allow for previewing the file within the browser for SAP ERP users. Softvative used Azure DevOps for code repository, SharePoint search-based solution, Thycotic's account management, Sharegate's migration products, and many other tools; Softvative's SPA-SharePoint integration made the solution a big success. The Customer's billions of dollars of business transactions over this integrated platform happened and were supported by Softvative.

Softvative helped customers with the Project Management Office solution by adopting PMI and agile processes and implementing Microsoft Project

PPM. Softvative has implemented solutions that were integrated with Oracle Peoplesoft for user additions / offboarding, with PowerBI for reports and dashboards, forms for project intake process, custom SharePoint template for Risk management and project documents, and integrated with timesheet and contractor invoicing. The company used roles-based training to help elevate the customer's users. The customers' PMO were able to execute the projects on time, within budget, and better quality.

Softvative will grow as the niche platform and services company in the industry; Softvative has launched Projenance.com as its SAAS platform with Budget Planner as the first product. Softvative will be working on its products for customer business transformation around project planning, Business process mapping and optimization, LEAN, ITSM, LMS, OCR, Information Security management, and architecture design SAAS solutions. Softvative has been expanding and growing. The company has served customers in government, healthcare, retail, agriculture, non-profit, energy, construction, and other verticals. Softvative will shortly have a new outlook with more innovative solutions and services.¹⁰
